Suggestions for Submitting Manuscripts for *Agricultural Economics Research*

Contributors can expedite reviewing and printing of their articles by doing these things

- 1 **SOURCE** Indicate in a memorandum how the material submitted is related to the economic research program of the U.S. Department of Agriculture and its cooperating agencies. State your own connection with the program.
- 2 **CLEARANCE** Obtain any approval required in your own agency or institution before sending your manuscript to one of the editors of *Agricultural Economics Research*. Attach a copy of such approval to the manuscript.
- 3 **ORIGINALITY OF MATERIAL** It is our policy to print original material. We consider alternative treatments of material published elsewhere, but such treatments need to differ substantially from the original approach. When submitting your manuscript, identify, if applicable, related material either published or submitted for publication.
- 4 **ABSTRACT** Include an abstract and at least three keywords when you submit your article. The abstract should not exceed 100 words. It should report the major findings of your research.
- 5 **NUMBER OF COPIES** Submit three good copies.
6. **TYPING** Double space everything, including abstract, footnotes, and references.
- 7 **FOOTNOTES** Number consecutively throughout the article.
- 8 **REFERENCES** Check all references carefully for accuracy and completeness.
- 9 **CHARTS AND OTHER ARTWORK** Use charts sparingly. Keep design as simple as possible. Submit all artwork in draft rather than in final form, accompanied by neatly prepared pages with essential data for plotting.

Readers interested in a chronological bibliography of materials in *Agricultural Economics Research* from the first issue in 1949 through the last issue in 1979 should write Clark Edwards, Senior Economist, ERS/EDD, U S Department of Agriculture, Washington, D C 20250

Readers interested in a bibliography arranged alphabetically by author of materials in *Agricultural Economics Research* from the first issue in 1949 through the current issue should write Clark Edwards, Senior Economist, ERS/EDD, U S Department of Agriculture, Washington, D C 20250

Economic Research Service

The Economic Research Service carries out research on the production and marketing of major agricultural commodities, foreign agriculture and trade, economic use, conservation, and development of natural resources, trends in rural population, employment, and housing, rural economic adjustment problems, and performance of the U S agricultural industry. ERS provides objective and timely economic information to farmers, farm organization members, farm suppliers, marketers, processors, consumers, and others who make production, marketing, and purchasing decisions, and to legislators and other public officials at the Federal, State, and local government levels.
