About ABA...

The American Bakers Association (ABA) advocates on behalf of over 700 wholesale baking facilities and their suppliers.

The baking industry generates more than $70 billion in economic activity annually.

The baking industry employs close to half a million highly skilled people.

Shopping last week in her local New York City grocery store, Elise Mackin, 32, filled her cart with items she knows to be good for her family — whole grains, fruits and veggies — and shied away from products that

"The special harmfulness of high-fructose corn syrup has become one of those urban myths that sounds right, but is basically wrong. Nutritionally, high-fructose corn syrup and sucrose may be identical."

Michael Jacobson, executive director of the Center for Science in the Public Interest
WASHINGTON -- Former President Bill Clinton on Thursday warned farmers that using too much corn for ethanol fuel could lead to higher food prices and riots in poor countries.

"We need a balanced approach," he said.

Expectations for 2011

- Early hopes of the 10/11 season returning the global balance to surplus are now forgotten
- Continued market volatility
- Despite uptick in production, market looks distressed
- Potential for political and weather related risk extremely high
- Rising food price inflation domestically and globally
- Significant potential for heightened trade retaliation
- Food industry margins will continue to be squeezed, especially among bakers
Recommendations:

- Ease ethanol mandates
- Phase out federal ethanol supports
- Eliminate sugar import quotas
- Eliminate sugar for ethanol mandate
- Eliminate sugar price supports
Results:

- Lower food price inflation domestically and globally
- Decrease trade tensions
- Eliminate barriers to job creation

The time has come.
Thank you
