FOREWORD

This publication reports the major discussions of the sixteenth national agricultural policy conference, held September 12-15, 1966, at Lake Hope State Park, Zaleski, Ohio. As in the past, the conference was planned by the National Committee on Agricultural Policy and sponsored by the Farm Foundation. Ninety-nine representatives from 46 states, the United States Department of Agriculture, and other interested agencies participated in the conference.

The purpose of these annual policy conferences is to assist extension workers who deal with agricultural policy problems through discussion of: (1) timely and useful information and (2) effective techniques for presenting this information to groups. The exchange of experiences and ideas at these conferences is designed to broaden the knowledge of participants, stimulate their thinking, and extend their horizons, thereby increasing their competence in dealing with the complex and multiple aspects of agricultural policy issues.

The report of the conference is being made available in the hope that it will be useful not only to state and county extension personnel but also to teachers, students, and others interested in increasing understanding of agricultural policy questions. The critical problems stemming from a changing agriculture in a changing world situation make it more important than ever to develop informed and responsible citizens who can make intelligent choices and participate effectively in formulating policies designed to solve these problems.

The Farm Foundation, following its policy of close cooperation with the state extension services, financed the instructional staff, transportation of one delegate from each state, and the publication of this report. The Farm Foundation, the Center for Agricultural and Economic Development, Iowa State University, and the Agricultural Policy Institute, North Carolina State University, assisted in developing the program for the conference.

Joseph Ackerman, *Managing Director*
Farm Foundation

CONTENTS

	PAGE
OPENING REMARKS.....G. B. Wood	1
PART I. MEETING WORLD FOOD NEEDS	
The World Food Problem—An Overview.....A. H. Moseman	5
